**Professional Outsourced Sales and Marketing Services to
the Electric Utility Industry Since 1934**

Covered Conductor (including tree wire) up to 52kV, AL1 AAC, AlMgSi and AL59 AAAC, copper conductor (hard drawn, annealed, tinned), conductor for regional and transmission networks from 0.4 to 400kV

Complete Arcflash Protection: Sensors, Relays, and High-speed arc quenching technology (through 17.5kV)

Digital Panel Metering, Intelligent Electronic Devices (Power Measurement, Event Recording, and Control), SCADA and IEC61850

Batteries USA

Batteries (Flooded, VRLA-Gel) and racks: Utility, TeleCom, & Solar Applications (IEC 61427)

High voltage switches, Generator switches, Motor Operators (Overhead, Underground, Crossarm Mounted), & Online Wireless Power Monitoring

Civil & Structural Engineering: Substations, Switchyards & Transmission Line Design

PVC Cellular Core Conduit – DB 120, Sch 40, & Sch 80

Wildlife Mitigation solutions for overhead lines - specializing in Avian Protection

State of the Art battery testing & monitoring equipment- Portable & Online options to meet and exceed NERC requirements

LVDC Microgrid Solutions, Next Gen Arc Suppression Coil, LV & MV Insulation Piercing Connectors, Complete MV OH line solutions (for bare & covered conductor)

Ground rods, clamps, and connectors

Substation Steel Structures, Tapered Tubular Structures for Substation Dead Ends and Transmission Lines, Pit Grating (galvanized steel or fiberglass)

Battery chargers, inverters, ups systems

Test Equipment: Protective Relay, IEC61850, Circuit Breaker, CT & VT, Transformer (Power Factor, SFRA, LTC), Dielectric Frequency Response, Partial Discharge (Rotating Machine monitoring, cables, instruments)

Network protectors, Network protector relays, and monitoring equipment. Medium voltage molded rubber connectors & products, Overhead distribution & pole line hardware, wildlife guards

Instrument transformers (LV, MV), HV Line Traps (72-500kV), Insulated Bus Bar Systems (SIS), Cast Coil Power Transformers

Highly reliable, secure, and hardened communication networks for substation applications

Annunciators: station class, apparatus, with communications

Substation Bus, Cable, and Ground fittings.

Transformers, Regulators, Breakers, Switches, Relays, Recloser, Switchgear, GIS, RTUs, SCADA systems, SMART Grid Solutions

Complete line of cable, rope and fiber optic, pulling and suspension grips

Air Core Reactors (Indoor and Outdoor); Shunt, Thyristor Controlled, Current Limiting, Smoothing, Filter, Damping, Test, Line Trap.

Emergency temporary crossing platforms and bridges for rapid deployment.

Transformer Care Systems: On-Line (Dry-Out and Oil Regeneration), High Vacuum Purification, Portable DGA, LTC filter System

Weidmann Electrical Technology, Inc.

Oil and SF₆ testing: Testing, Analysis & Diagnostics (On-Line and Engineering Support)
Engineering Services: Education, Training, Assessment (Substation and Power Plant HV Assets)
Monitoring Systems: Hydrogen, Bushing, Transformer Hot Spot Temperature, Oil Dielectric
